

## Introducing “CLIMATE COACHING” *for Hingham Residents by Hingham Residents*

**Investing in a new technology or pursuing a greener lifestyle can be intimidating for many of us. The amount of information out there can be overwhelming – what better way to pursue these low-carbon and cost-saving ventures than with the guidance of a fellow Hingham resident who has done all the legwork for you!**

HNZ’s CLIMATE COACHING PROGRAM connects you with an experienced and knowledgeable local volunteer who can support Hingham residents at every step of adopting a particular green tool, technology or lifestyle (such as financing and installation). We will help you implement cost-effective personal strategies for reducing your household environmental impacts in several specific areas, including:

- Carbon Footprint Calculation
- Electric Vehicles
- Solar Panels
- Heat Pumps (air source and/or geothermal)
- Home Energy Efficiency
- Low-carbon Diets

### **To connect with a Climate Coach**

**EMAIL** [hinghamnetzero@gmail.com](mailto:hinghamnetzero@gmail.com)

**VISIT** [www.hinghamnetzero.org](http://www.hinghamnetzero.org)

HINGHAM NET ZERO is a group of local residents working to raise awareness of the need for aggressive climate action, to support the Town’s efforts to cut emissions, and to work to reduce carbon emissions in our town as quickly as possible.
